Spotlight on Soft Tissue Phenotype

1 Hour CDE Credit

Clinical Excellence Series 2024: Presented by Zufall Health and Delta Dental

MEET THE SPEAKER

Anuja Doshi, DDS, is a Diplomate of the American Board of Periodontology and a Fellow-elect of the Royal College of Dentists, Canada. She an Assistant Professor and Director of DMD Periodontics at the University of British Columbia, Vancouver. Doshi's commitment to advancing periodontal education has earned her recognition from the American Academy of Periodontology (AAP) and AAP Foundation. Notably, she was honored with the prestigious Dr. D Walter Cohen Teaching Award in 2019, and the Excellence in Teaching and Mentoring in Periodontics award in 2020 and 2024. Doshi currently serves as the Chair of the American Dental Education Association (ADEA)'s Section on Periodontics.

Wednesday, August 28, 2024

6:00 - 7:00 PM EDT (one hour)

- 6:00 6:05: Introduction
- 6:05 7:00: Educational Content

Zoom Events (Registration required and space is limited)

Free; dental credits offered

Zufall Health is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Zufall Health designates this activity for <1> continuing education credits.

OVERVIEW

This course explores the critical role of soft tissue phenotype in maintaining the health and longevity of both natural teeth and dental implants. Participants will gain a comprehensive understanding of the components of soft tissue phenotypes and their implications for periodontal and peri-implant health. Participants will learn clinical techniques for assessing soft tissue phenotype and the surgical techniques for modifying it to optimize clinical outcomes. This course will equip participants with the knowledge needed to make informed decisions.

OBJECTIVES

At the conclusion of this program, participants will be able to:

- 1. Identify the components of periodontal and peri-implant phenotype
- Understand the impact of tissue phenotype or periodontal and peri-implant health.
- 3. Discuss evidence-based indications and considerations for soft tissue phenotype modification surgeries
